Quality & Certifications

Quality management is an integral part of the entire production process. Quality control procedures are applied at key stages of production, including raw material inspection, in-process monitoring, and final product evaluation, ensuring consistency and compliance with defined specifications.

Each production batch is monitored to verify workmanship, durability, and finishing accuracy. Final inspections are carried out prior to packaging and shipment, with internal quality documentation supporting traceability and transparency for our partners.

Packaging, Logistics & Lead Time

Packaging

Packaging at GTE Trade is managed with a focus on product protection, compliance, and client requirements. Packaging formats are defined in coordination with each client, considering product type, labeling standards, transportation method, and destination market needs. All products are packed to ensure integrity during storage and transit, with custom packaging options available upon request.

Logistics

Logistics are organized according to agreed shipping terms. GTE Trade supports both EXW (Ex Works) shipments, managed by the client, and CIF (Cost, Insurance and Freight) shipments, coordinated by GTE Trade through selected logistics partners, allowing flexibility in supply chain planning.

Lead Time

Lead times depend on product type, order volume, and production planning. The average production lead time is 2 to 4 weeks from order confirmation, with timelines communicated in advance and monitored to ensure reliable delivery.

Current Export Destinations

GTE Trade currently ships to these countries, with plans to expand further.

Albania, Italy, Germany, France, Netherlands, Romania, Spain, North Macedonia, Bulgaria.
